

## **EU Directive 2000/53/EC (End-of-Life Vehicles) as Amended by Commission Decision 2016/774/EU**

Birla Carbon's carbon black products include all ASTM, BC, CD, Conductex®, Copeblack®, PM, Raven®, and Ultra® grades.

The End-of-Life Vehicles Directive prohibits the use of the following substances above the threshold level in electrical and electronic equipment (EEE) placed on the EU market after July 1, 2006, provided the following substances are not intentionally introduced:

- 0.1% by weight in homogenous materials – lead, mercury, and hexavalent chromium; and,
- 0.01% by weight in homogenous materials – cadmium

To the best of our knowledge, the above listed substances are not intentionally added to Birla Carbon's carbon black products. Though these substances may be present as impurities, these substances are not present in concentrations exceeding the threshold levels specified by the Directive.

The information presented within this publication is based on Birla Carbon's analysis and the analysis of others. Birla Carbon disclaims all representations and warranties regarding performance or use, express or implied, including implied warranties of merchantability and fitness for a particular purpose. The user is responsible for determining the suitability of any product for a specific purpose and the manner in which the product is used. Before handling, using, or processing any material, always read its Safety Data Sheet.
